

### Product's Highlights

- 2 cores 16AWG Multi-Conductor Shielded Commercial Cable
- Stranded Tinned Copper Wire outer shielded with Aluminum foils 100% coverage outer shielded material
- Bare Copper Conductor Material
- Indoor application

### Description

Netway N2CSMC100 was built using 2 cores 16AWG (19 x 29) bare copper conductor for indoor use. The 1 pair cable shielded with 100% aluminium foil-polyester tape was constructed with 300V RMS operating voltage. The shielding noise to penetrate into the cable, its avoid leaking of any audio signals from the cable. This cable was widely use for public address or professional sound speaker installation.

### Technical Specifications

Description	
Conductor Material & Diameter	2 Cores 16 AWG
Insulation Material & Diameter	BC-Bare Copper
Stranding	19 x 29
Insulation Material	Solid PE, Thickness: 0.4mm
Outer Shielded Material Overall	Aluminium Foils 100% Coverage
Outer Jacket	PVC, Gray Color
Outer Jacket Nominal Wall Thickness	0.7mm
Outer Jacket Ripcord	Yes
Outer Shield Drain Wire AWG	24AWG, 7 x 0.202mm (7 x 32AWG) Stranded Tinned Copper Wire
Overall Cabling Diameter	6.0mm ± 10%
Cable Color Code	Black / Red
Cable Marking	Per Meter Run
Operating Temperature Range	-20°C To +75°C
Electrical Characteristics	
Impedance	57 Ohm ± 20%
Max Operating Voltage	300V RMS
Max Recommended Current	6.25 Amps per conductor at 25°C

### Applications

- Commercial speaker installation
- Control system

### Ordering Information

Indoor Type 1 Pair 16AWG Shielded Commercial Audio Cable, 305 meters per drum

**Order Info: NETWAY N2CSMC100**
